Hi Todd,

Near the Anchor 1 / Casco Group mine (S/027/0025; UTU-079849), there's a permit open with our Division for another "mine" called Danny's Mine (S/027/0029, UTU-070668). The permittees are Virginia Gehre and Daniel Land. That's probably where Paul found production numbers. We have no NOI or other map, but this map is from a claim map in the file (so they're located 1/2 mile WSW of the Casco Group). You can see it using the mine locations file that I just sent.

I saw only minor disturbance on the ground in 2014. See attached photos. If they aren't using mechanized earthmoving equipment, it's not worth permitting on our end, I don't think. It sounds like they may be more active of late, based on their reports with us.

Has BLM closed their corresponding file? Do they have authorization? If they don't, we will need to tell them and close our file and stop paying permit fees. I don't see it on your Google Earth file of your BLM sites sent a while back.

Peter
